

A red circle containing a white lowercase letter 'i'.

PRODUCT INFORMATION

## *ProBike*

Motorcycle clamping device

*Series 815*

## Product Description

The motorcycle clamping device ProBike, with related accessories, enables simple and exact centring of motorcycle wheels on a wheel balancing machine.

Depending on which type of wheel balancing machine the ProBike wing is attached, either a cylindrical or a conical insert chuck must be used for the shaft connection.

The ProBike wing can also be installed on pneumatic or electro-mechanical balancing machines.

## Product features

- Precise wheel balancing
- Optimized machine connection
- Safe and easy handling
- Can be universally used for every type of machine
- Easy and quick installation
- Longer lugs
- More powerful gas compression springs

## Scope of Delivery ProBike

- ① ProBike wing
- ② Centering shaft  $\varnothing$  14 mm
- ③ Set of centering cones:  $\varnothing$  15 - 30 mm
- ④ Set of cones, scooter:  $\varnothing$  16 - 45 mm
- ⑤ Centering sleeves:  $\varnothing$  15 / 17 / 20 mm
- ⑥ Centering sleeve for Piaggio and Vespa
- ⑦ Pressure piece  $\varnothing$  14 mm for BMW / Moto Guzzi
- ⑧ Wall board
- ⑨ QuickFix  $\varnothing$  14 mm
- ⑩ Knurled nut
- ⑪ Pin wrench

*Application of the ProBike.*

## Upgrade Kits for ProBike

### Upgrade kit for floating axles

- ① Centering shaft Ø 19.05 mm
- ② Centering sleeves Ø 22 / 25,4 / 25 / 26 / 28 / 30 / 32 / 35 mm
- ③ QuickFix Ø 19 mm
- ④ Spacer sleeve short
- ⑤ Knurled nut
- ⑥ Pressure pieces Harley Davidson
- ⑦ Wall board

Upgrade kit for floating axles  
Item No. 815 008 002

### Profi-Kit for single arm rockers

- ① Pressure piece Ø 19.05 mm
- ② Locating disc Triumph / Honda
- ③ Locating disc Ø 14 mm BMW / Moto Guzzi
- ④ Locating disc Aprilia / BMW / Yamaha
- ⑤ Locating disc BMW
- ⑥ Locating disc Honda
- ⑦ Locating disc Triumph / KTM
- ⑧ Locating disc Honda / MV Agusta
- ⑨ Spacer sleeve long
- ⑩ Locating disc Ducati
- Locating disc Kawasaki (follows shortly)

Upgrade kit for single arm rockers  
Item No. 815 008 003

## Optional accessories

Wall board stands  
Item No. 900e008 190

*Example of application*

### Product Overview

#### ProBike

conical

Item No. 815 818 010

#### ProBike

cylindrical

Item No. 815 xx1 010

#### Upgrade Kit

for floating axles

Item No. 815 008 002

#### Profi-Kit

for single arm rockers

Item No. 815 008 003

### Data of item number for cylindrical connections:

Ø 28 mm / 36 mm / 38 mm / 40 mm

Item No.: 815 xx1 010

(xx = Shaft diameter of the balancing machine)

### ProBike Advantages

Product Description:	<p><b>ProBike (incl. 14mm centring shaft):</b> Basic equipment for motorcycles with floating axles. Enables balancing of smaller diameter axle using centring sleeves and larger using cones (up to Ø 46 mm) incl. scooter wheels</p> <p><b>Upgrade kit for floating axles (incl. 19.05mm centring shaft):</b> Best equipment for motorcycles with floating axles. Enables the balancing of all diameters of axle from Ø 19.05 to 35 mm using centring sleeves on the much more stable Ø 19.05mm centring shaft. "Tipping" of the shaft is prevented.</p> <p><b>Profi-Kit for single arm rockers:</b> Best equipment for motorcycles with single arm rockers. Balancing is carried out on the Ø 19.05 mm centering shaft.</p>
Centering shaft:	Only one type of motorcycle shaft (in Ø 14 and Ø 19.05 mm)
Attachment of the motorcycle shaft on the ProBike wing:	Simple attachment using a hexagon nut
